## In the Claims

- 1. (Currently Amended) An isolated and purified protein comprising a mammalian K<sup>+</sup> channel with two pore domains, wherein said channel produces currents whose current-voltage relationship is weakly inwardly rectifying in high symmetrical K<sup>+</sup> conditions, and wherein said channel comprises the amino acid sequence of SEQ ID NO: 2.
- 2. (Original) The protein of claim 1, wherein said channel is a human K<sup>+</sup> channel.
- 3. (Currently Amended) The protein of claim 1, having a sequence of amino acids as set forth in consisting essentially of the amino acid sequence of SEQ ID No. 2. NO: 2.
- 4. 26. (Cancelled)
- (Currently Amended) The mammalian K<sup>+</sup> channel of claim 1, wherein said high symmetrical K<sup>+</sup> conditions is a K<sup>+</sup>-rich external medium of around about 150mM.
